

Coober Pedy Trip OFFER 6 July 2021

Folks

As I told you I went to Coober Pedy with an old Mintubi miner and had a ball meeting old friends, even some new miners. Each Friday night the Greek Club has a huge barbecue. I attended and renewed old acquaintances with a number of people I hadn't seen since the 70's and 80's. Yes we are old but we do have some knowledge of opals.

I've secured some shells, one of which is in this Offer #34-35 \$875, it is as full as any shell could be and an absolute perfect item for either a collector or cutter. There is a gem bar running through it and the top of the shell has some lovely blues. It weighs 126cts which is huge for a cockle shell and only \$6.94/ct which is unheard of. Highly recommended.

The three brilliant shell pieces came from a magnificent Shell Patch parcel #26 \$436, the best I had seen or my mate had seen in 10 years. The colour in all of these three shells is at least \$10,000/oz but it is only costing you \$96/gram which is roughly \$3,000/oz. Highly recommended.

Mintubi has closed down as I've told you a number of times but I did get some black opal, it's old stock but it had been in the ground for millions of years so don't let that worry you. The miner had been putting the three black opals that we offer you today away for a rainy day. Yes, the good news it, it has rained in Coober Pedy and one of my mates could not get to his claim at Opal Valley for a number of days for fear of being bogged. The three black opals to which I refer are priced at \$225 #21, \$675 #31-33 and \$1,200 #40-42. The two larger stones are held together by sandstone and you'll get three or four smaller stones from them. Don't expect just to get one huge opal with this colour for only \$675 or \$1,200.

I've put in an array of Lightning Ridge rough much of it has been faced or rubbed which is the way the Lightning Ridge miners have to operate because if they don't rub a stone they could be giving away a \$50,000 opal for not much more than potch and colour so you can't blame them for having a look.

I've put in seven grades of rough for less than \$100 so that will enable everyone to have a chance of buying something which as we know depends on your pocketbook. I particularly like the \$120 Ridge blue Rub #12 and the \$120 Ridge green Rub #13 is the green one.

For those of you who don't have cutting equipment the \$150 Tumbled opals #17 will be great for you, all you have to do is give them a good hand polish and you'll have a lovely dozen opals which is only \$12.50 each. You wouldn't buy opal on the field at this price.

The Coober Pedy brilliant blue green very large stone as large as the top part of a man's thumb for only \$475 #28. I can highly recommend.

If you can use small bright stones, the 1.2oz for \$620 #29-30 is for you. There are some beautiful reds golds and greens even a couple of lovely black opals. Highly recommended.

Last but nowhere near least is the Coober Pedy greens and golds for \$1,008 #36-38, four large stones each one will be thrilling to cut.

Enjoy this Offer. If you would like to see some more Shell Patch tell me and we will get you some photos and you'll end up with some opals that you will treasure very highly.

Murray

1. \$37.50 IMG_8351 (MW) Coober Pedy White Base Chips \$7.50/oz 5oz
